CONTENTS

Volume 29, Issue Nos. 1–8 (1990)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

ANNOUNCEMENT ii

An Accurate Determination of Stresses in Thick Laminates Using a Generalized Plate Theory: E. J. Barbero, J. N. Reddy and J. Teply 1

A Full Tangent Stiffness Field-boundary-element Formulation for Geometric and Material Non-linear Problems of Solid Mechanics: H. Okada, H. Rajiyah and S. N. Atluri . . 15

A Combined Octree/Delaunay Method for Fully Automatic 3-D Mesh Generation: W. J. Schroeder and M. S. Shephard 37

Axisymmetric Contact of an Elastic Layer Underlain by Rigid Base: H. Li and J. P. Dempsey 57

Total Lagrangian Formulation for the Large Displacement Analysis of Rectangular Plates: B. Chang and A. A. Shabana 73

Numerical Integration Strategy for Plates and Shells: C. J. Burgoyne and M. A. Crisfield 105

An Alternative Numerical Procedure for Simulating the Dynamical Response of Non-linear Elastic Rods: R. Martins and S. Da Gama 123

A New Implementation of the Lanczos Method in Linear Problems: M. Papadrakakis and S. Smerou 141

Application of the Complex Variable Boundary Element Method to Solving Potential Problems in Doubly Connected Domains: A. J. Kassab and C. K. Hsieh 161

Effects of Material Non-linearity on the Residual Stresses in a Dendritic Silicon Crystal Ribbon: S. K. Ray and S. Utku 181

A Non-proportional Loading Finite Element Analysis of Continuum Damage Mechanics for Ductile Fracture: J. Wang and C. L. Chow 197

LETTER TO THE EDITOR 211

AUTHORS' REPLY 217

CONFERENCE DIARY 219

Indexed or abstracted by 'Abstract Jnl. in Earthquake Engineering', 'Applied Mechanics Review', 'Boundary Element Abstracts', 'Cambridge Scientific Abstracts', 'CITIS-Civil Engineering Abstracts', 'Current Contents', 'Engineering Index Inc', 'Eng. Societies Library', 'Geodex', 'Geotechnical Abstracts', 'Indian Society of Earthquake Technology', 'INSPEC', 'International Petroleum Abstracts', 'Mathematical Reviews', 'Mechanics', 'Newsletter of Engineering Analysis Software', 'Shock and Vibration Digest', 'Zentrablatt fur Mathematik'.

Issue No. 2

Element by Element *A Posteriori* Error Estimation and Improvement of Stress Solutions and Two-dimensional Elastic Problems: H. Ohtsubo and M. Kitamura 223

The Generalized Boundary Element Approach to Burgers' Equation: K. Kakuda and N. Tosaka 245

A Boundary-integral Formulation for Complex Three-dimensional Geometries: M. Rezayat and T. E. Burton 263

Higher Derivative Explicit One Step Methods for Non-linear Dynamic Problems. Part I: Design and Theory: C. Hoff and R. L. Taylor 275

Higher Derivative Explicit One Step Methods for Non-linear Dynamic Problems. Part II: Practical Calculations and Comparisons with Other Higher Order Methods: C. Hoff and R. L. Taylor 291

Hybrid Method for Transient Response of Circular Pins: H.-T. Chen 303

Studies in Anisotropic Plasticity with Reference to the Hill Criterion: R. De Borst and P. H. Feenstra 315

Non-linear Vibration of Frames by the Incremental Dynamic Stiffness Method: A. Y. T. Leung and T. C. Fung 337

The Effect of Temperature and Total Gas Pressure on the Moisture Content in a Capillary Porous Body: R. W. Lewis and W. J. Ferguson 357

Inelastic Transient Dynamic Analysis of Three-dimensional Problems by BEM: S. Ahmad and P. K. Banerjee 371

Adaptivity in Hybrid-Trefftz Finite Element Formulation: J. Jirousek and A. Venkatesh 391

A Hybrid/Mixed Model for Non-linear Shell Analysis and its Applications to Large-rotation Problems: A. F. Saleeb, T. Y. Chang, W. Graf and S. Yingyeunyong . . . 407

BOOK REVIEW 447

CONFERENCE DIARY 449

Issue No. 3

Importance and Use of Rigid Body Mode in Boundary Element Method: M. Vable . . 453

Non-linear Optimization Technique for Partial Solution of Generalized Eigenvalue Problems: B. Marcos and J. G. Béliveau 473

Formulation of Implicit Finite Element Methods for Multiplicative Finite Deformation Plasticity: B. Moran, M. Ortiz and C. F. Shih 483

Magnetostatic Field Computations in Terms of Two-component Vector Potentials: B. Albanese and G. Rubinacci 515

Computer Simulation of Turbulent Swirling Flows: A. Riahi, M. Salcudean and P. G. Hill 533

A Panel Method Computation for Oscillating Aerofoil in Compressible Flow: S. H. Leong 559

Automatic Step Size Correction for Non-associated Plasticity Problems: H. Van Langen and P. A. Vermeer 579

Model Reduction for Thermal Diffusion: Application of the Eitelberg, Marshall and Aggregation Methods to a Heat Transmission Tube Model: M. T. Ben Jaâfar, R. Pasquetti and D. Petit 599

Parallel Multisplitting, Block Jacobi Type Solutions of Linear Systems of Equations: Y. S. Roditis and P. D. Kiousis 619

A Surface Fitting Method for Three Dimensional Scattered Data: C. A. Balaris and S. M. Jeter. 633

A New Approach in Non-linear Mechanics: The Large Time Increment Method: Ph. Boisse, P. Bussy and P. Ladeveze 647

A Finite-element Model of Two-layer Ocean Circulation: R. Bermejo 665

CONFERENCE DIARY 679

Issue No. 4

Vibration Analysis of Fluid–Solid Systems Using a Finite Element Displacement Formulation: H. C. Chen and R. L. Taylor 683

Singular Behaviour Near an Interface Crack Tip of Power Law Hardening Materials Using the Finite Element Iterative Method: R. S. Barsoum 699

The Multigrid Method in Solid Mechanics: Part 1—Algorithm Description and Behaviour: I. D. Parsons and J. F. Hall 719

The Multigrid Method in Solid Mechanics: Part II—Practical Applications: I. D. Parsons and J. F. Hall 739

A Dynamic Contact Buckling Analysis by the Penalty Finite Element Method: Y. Kanto and G. Yagawa 755

Consistent Force Resultant Distributions in Displacement Elements with Varying Sectional Properties: G. Prathap and B. P. Naganarayana 775

Some Observations on Time Domain and Frequency Domain Boundary Elements: O. Von Estorff, A. L. Pais and E. Kausel 785

Improved Hybrid Solid Element with a Traction-free Cylindrical Surface: Z. Tian and Z. Tian 801

The Dynamic Response of Complaint Materials to an Impulsive Pressure Field: J. M. D'Sa and C. Dalton 811

A Non-Jacobian Numerical Quadrature for Semi-infinite Integrals: B. M. Liaw and M. Kamel 833

Contact Problems of Kinked Cracks Modelled by a Boundary Integral Method: W. L. Zang and P. Gudmundson 847

Explicit Integration for Three-dimensional Degenerated Shell Finite Elements: S. Vlachoutsis 861

Data Structures and Algorithms for the Finite Element Method on a Data Parallel Supercomputer: S. L. Johnsson and K. K. Mathur 881

CONFERENCE DIARY 909

Issue No. 5

A Semi-analytical Method for Time-domain Analyses of Dam–Reservoir Interactions: C.-S. Tsai, G. C. Lee and R. L. Ketter 913

A Subspace Forward Iteration Method for Solving the Quadratic Eigenproblem Associated with the FDE Formulation: T. E. C. Gmuer 935

A Finite Element Formulation for the Coupled Thermoviscoelastic Response of Solid–Fluid System: D. Lévesque and L. Bertrand. 953

A Fixed Grid Finite Element Technique for Modelling Phase Change in Steady-state Conduction–Advection Problems: E. Pardo and D. C. Weckman 969

Free Vibration of Axisymmetric Solids by BEM using Particular Integrals: H.-C. Wang and P. K. Banerjee 985

Advanced Development of Time-domain BEM for Two-dimensional Scalar Wave Propagation: A. S. M. Israil and P. K. Banerjee 1003

Application of the Boundary Element Method to Non-linear Diffusion with Reaction Problems: P. A. Ramachandran. 1021

Finite Element Analysis of Multiconductor Printed-circuit Transmission-line Systems: S. Castillo, Z. Pantic and R. Mittra 1033

Time-domain Radiation Boundary for Analysis of Plane Love-wave Propagation Problem: A. Anandarajah 1049

A Truncated Newton–Lanczos Method for Overcoming Limit and Bifurcation Points: M. Papadrakakis 1065

Flow Through Fissured Porous Media with Deformable Matrix: S. Valliappan and N. Khalili-Naghadeh 1079

Two-level Domain Decomposition Preconditioning for the *p*-version Finite Element Method in Three Dimensions: J. Mandel 1095

Validation of Structural Computation Codes in Elastoviscoplasticity: A. Benallal, P. Chabrand, M. Ghazouane, M. Chaudonneret, J. P. Culié, E. Contesti, H. Gamha, J. C. Golinval and A. Turbat 1109

CONFERENCE DIARY 1131

Issue No. 6

Hypersingular Integrals in Boundary Element Fracture Analysis: L. J. Gray, L. F. Martha and A. R. Ingraffea 1135

A Finite Element Methodology to Predict Age-related Mechanical Property and Structural Performance Changes in High Performance Polymers: D. T. Wadiak, P. M. Bond, N. A. Cyr, S. Fields, G. H. Ferguson and L. W. Swenson 1159

An Embedding Method for the Numerical Solution of the Cathode Design Problem in Electrochemical Machining: R. Hunt 1177

Tangent Constitutive Matrices for Inelastic Finite Element Analysis: H. R. Riggs and G. H. Powell 1193

Effects of Spatial Discretization on Dispersion and Spurious Oscillations in Elastic Wave Propagation: L. Jiang and R. J. Rogers 1205

Dynamic Modelling of Skeletal Systems with Arbitrary Mass Distributions: H. A. Smith and R. J. Melosh 1219

An Efficient L_2 Galerkin Finite Element Method for Multi-dimensional Non-linear Hyperbolic Systems: P. Bar-Yoseph and D. Elata 1229

Error Indicators for Adaptive Mesh Refinement in the Boundary Element Method—A New Approach: M. Guiggiani 1247

A Hybrid Differential–Algebraic Method for Three-dimensional Grid Generation: J. Zhu 1271

Application of the Zienkiewicz–Zhu Error Estimator for Plate and Shell Analysis: S. M. Yunus, T. P. Pawlak and M. J. Wheeler 1281

An Approach to the Generation of Triangular Grids Possessing Few Obtuse Triangles: K. Deljouie-Rakhshandeh 1299

A Boundary Element Algorithm Using Compatible Boundary Displacements and Tractions: R. Piltner and R. L. Taylor 1323

Least-squares Characteristics and Finite Elements for Advection–Dispersion Simulation: C. W. Li 1343

CONFERENCE DIARY 1359

Issue No. 7

A Study of Incremental–Iterative Strategies for Non-linear Analyses: M. J. Clarke and G. J. Hancock 1365

Curved Shell Elements Based on Hierarchical *p*-Approximation in the Thickness Direction for Linear Static Analysis of Laminated Composites: K. S. Surana and R. M. Sorem 1395

Advanced Time-domain Formulation of BEM for Two-dimensional Transient Elastodynamics: A. S. M. Israil and P. K. Banerjee 1421

A Robust Self-starting Explicit Computational Methodology for Structural Dynamic Applications: Architecture and Representations: K. K. Tamma and R. R. Namburu . . . 1441

A Finite Element Model for Non-linear Shells of Revolution with Finite Rotations: W. Wagner 1455

Prediction of Thermal Stress and Deformations Due to Phase Change in Solidifying Objects Via Flux/Stress Based Finite Element Representations: K. K. Tamma and R. R. Namburu 1473

On the Use of One Point and Two Points Singularity Elements in the Analysis of Kinked Cracks: B. K. Dutta, S. K. Maiti and A. Kakodkar 1487

Two-dimensional Mesh Generation, Adaptive Remeshing and Refinement: H. Jin and N.-E. Wiberg 1501

The Numerical Simulation of Electron Transmission Through a Two-dimensional Quantum Device by the Finite Element Method: D. J. Kirkner, C. S. Lent and S. Sivaprakasam 1527

A Numerical Integration Scheme for Finite Element Method Based on Symbolic Manipulation: G. Yagawa, G.-W. Ye and S. Yoshimura 1539

Development of An Automatic, Two-dimensional Finite Element Mesh Generator Using Quadrilateral Elements and Bezier Curve Boundary Definition: J. A. Talbert and A. R. Parkinson 1551

Inverse Finite Element Techniques for the Analysis of Solidification Processes: N. Zabaras 1569

CONFERENCE DIARY 1589

Issue No. 8

A Class of Mixed Assumed Strain Methods and the Method of Incompatible Modes: J. C. Simo and M. S. Rifai 1595

Effect of Integration Methods on the Solution of an Adiabatic Shear Banding Problem: R. C. Batra and C. H. Kim 1639

Natural Approach for Thin-walled Beam-columns with Elastic-plasticity: A. Conci and M. Gattass 1653

Two-level Approximation Concept in Structural Synthesis: M. Zhou and R. W. Xia . . 1681

Solution of Radiative Problems Using Variational Based Finite Element Method: G. Breitbach, J. Altes and M. Sczimarowsky 1701

On the Superconvergence of the Satisfying-Babuska–Brezzi Method: L. P. Franca . . 1715

Boundary Elements in Zoned Media: Direct and Indirect Methods: D. E. Medina, M. H. Lean and J. A. Liggett 1727

Free-vibration Analysis of Three-dimensional Solids by BEM: R. B. Wilson, N. M. Miller and P. K. Banerjee 1737

A Numerical Technique for the Solution of Two Dimensional Elasticity Problems: S. S. Tarazi and J. A. Mandel 1759

Partial Hybrid Stress Element for Transient Analysis of Thick Laminated Composite Plates: H.-S. Jing and M.-L. Liao 1787

BOOK REVIEW 1797

CONFERENCE DIARY 1799
